Asset Sustainability

Production Growth

Return of Capital to Shareholders

Strategic Growth Levers

Utilize Exploitation and Technology

UNLOCKING EXTENSIVE LAND BASE USING GLOBALLY-PROVEN TECHNOLOGY

Capture Liquids-Rich Gas Opportunities

PURSUING ONSHORE, WORLD-CLASS GAS PLAYS THAT ARE UNDEREXPLORED

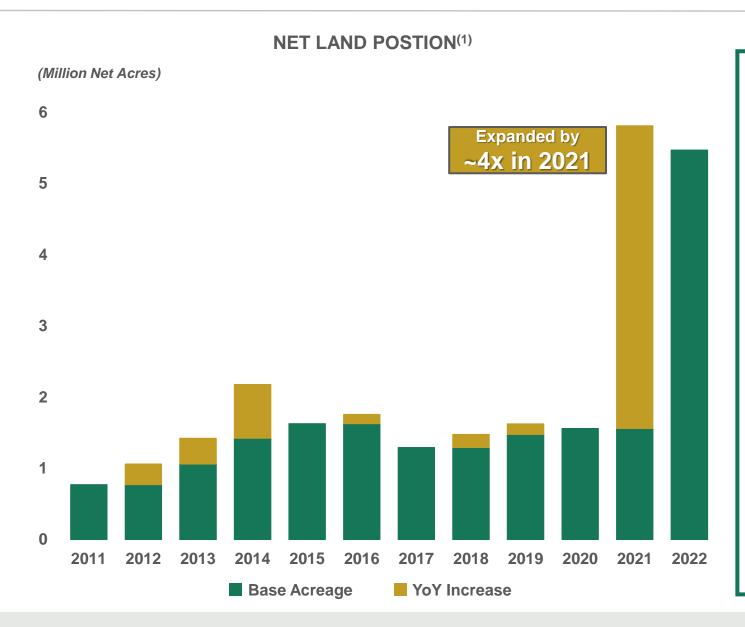

Deliver Outsized Exploration Potential

FOCUSING ON THE EXECUTION OF TRANSFORMATIONAL, HIGH-IMPACT PROSPECTS

Asset Running Room in Colombia

First-Mover Advantage

- Largest independent acreage holder in Colombia with 40 blocks
 - 18 blocks added in the 2021 Colombia bid round
 - Built on existing relationship with Ecopetrol
 S.A. with executed Arauca & LLA-38 farm-in
- Purposefully acquired long-lead items and equipment for capital programs
 - Limited cost inflation exposure
- Technology and people are in place to execute strategy
 - Parex is a leader in bringing globally-proven technology and expertise to Colombia

(1) As at year end; accounts for relinquished land and working interest where applicable.

2024 Guidance

Average Production

54,000-60,000 ~5% Growth at

Midpoint vs. 2023

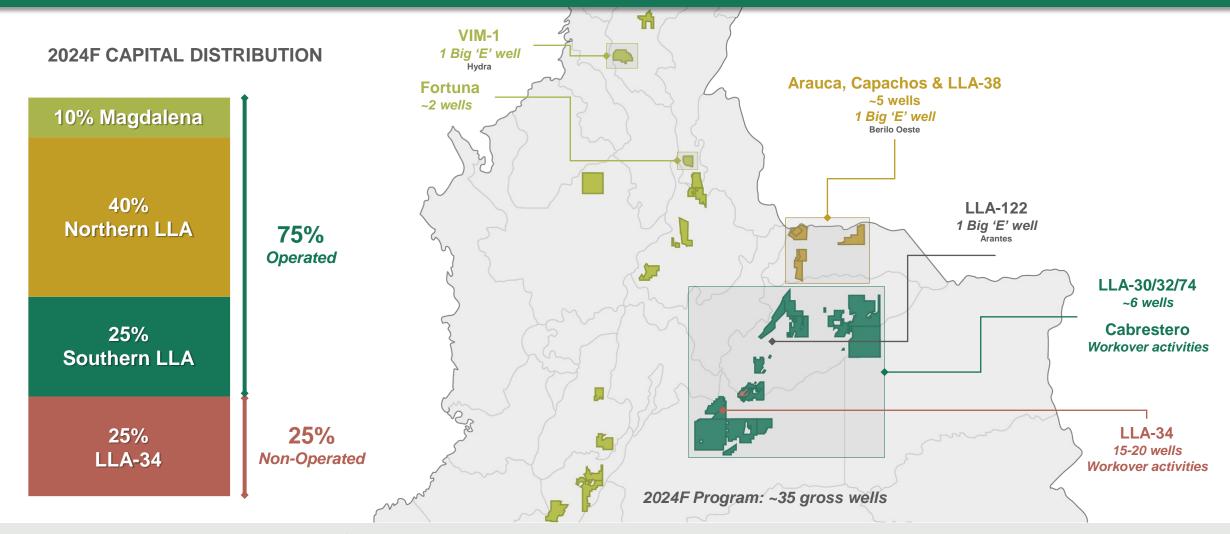

Funds
Flow
\$ millions

\$590-660⁽¹⁾ \$75/bbl Brent

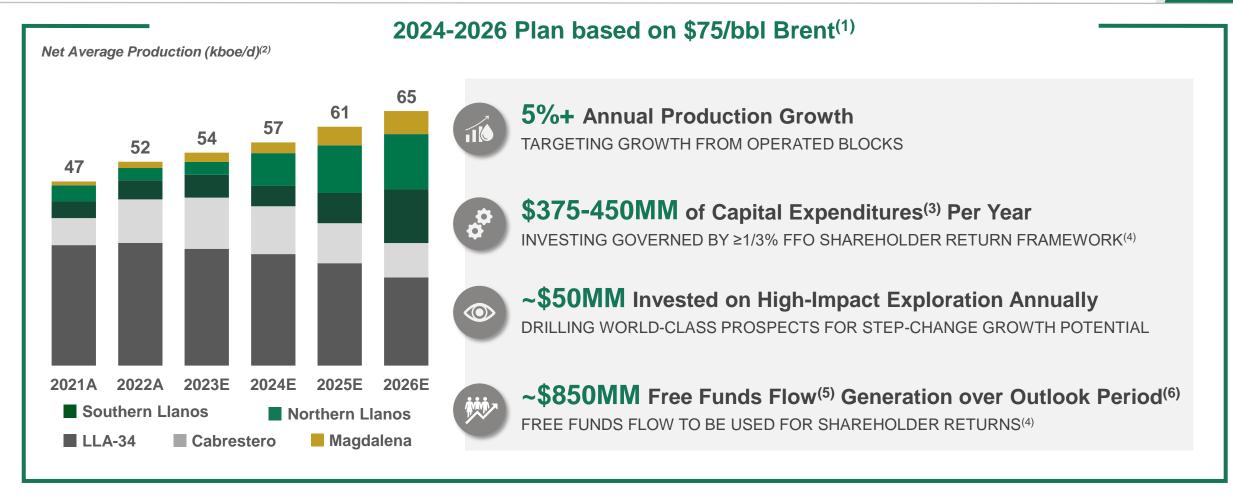

Capital Expenditures \$ millions

\$390-430⁽²⁾
~15% Lower at
Midpoint vs. 2023

Three-Year Plan: Growing Production & Free Funds Flow

Plan increases production at reduced capital expenditures⁽³⁾ while providing exposure to high-impact exploration and increasing shareholder returns

Long-Term Capital Allocation Framework

1. Reinvest ~2/3 of FFO⁽¹⁾ into Business

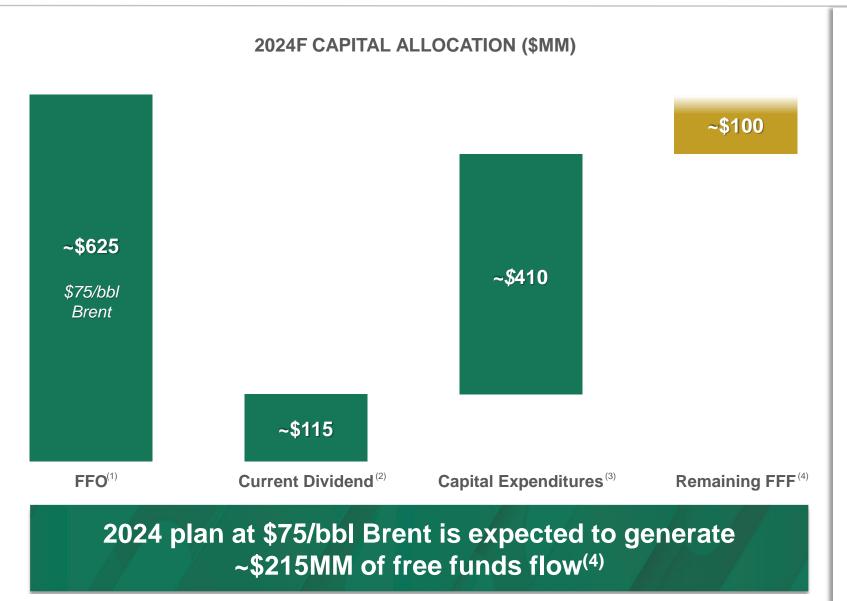

2. Return ≥1/3 to Shareholders⁽²⁾

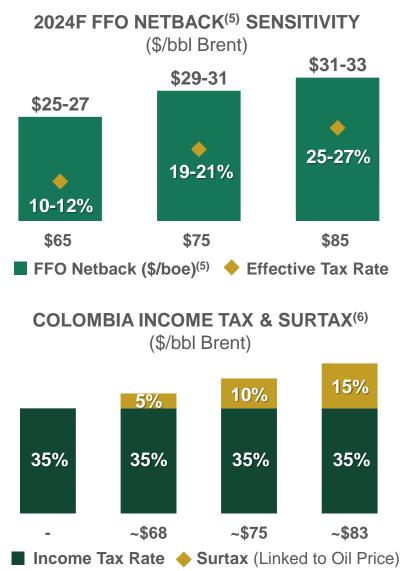

Near-Field Investments	Big 'E'	Regular Dividends + Share Buybacks
 Drive sustainable business model Invest in long-term growth Replenish development inventory Portion of investment geared towards high-impact, big 'E' explorati Actively manage risk & reward Capitalize on Colombia advantage to generate potential for outsized 		 Quarterly regular dividend Target dividend growth Ensure sustainability through commodity cycles Share repurchases Mechanism to supplement returns

Target the return of at least 1/3 of total FFO⁽¹⁾ to shareholders through regular dividends and share buybacks

Capital Allocation Framework Reinforced by 2024 Plan

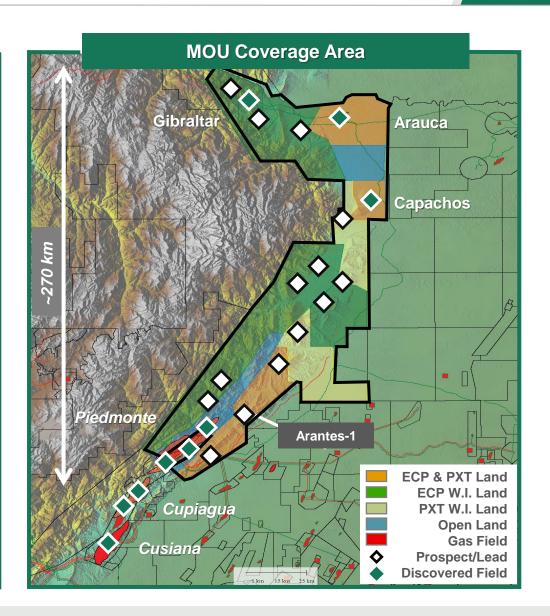

MOU with Ecopetrol in High-Potential Foothills Trend

Memorandum of Understanding (MOU) with Ecopetrol S.A.⁽¹⁾

- MOU signed with Ecopetrol, Colombia's national oil company
 - Building on existing, successful relationship with Ecopetrol
 - Area of coverage spans 13 blocks in the high-potential Foothills trend in the Llanos Basin
- Focus of the MOU
 - Maximize synergies within the trend
 - Capitalize on use of existing infrastructure
- Progress is already underway
 - Capachos farm-in: operating block
 - Arauca & LLA-38 farm-in: initial well tests began in Q4 2023
 - Next step: LLA-122 (Arantes) was spud in early Q1 2024

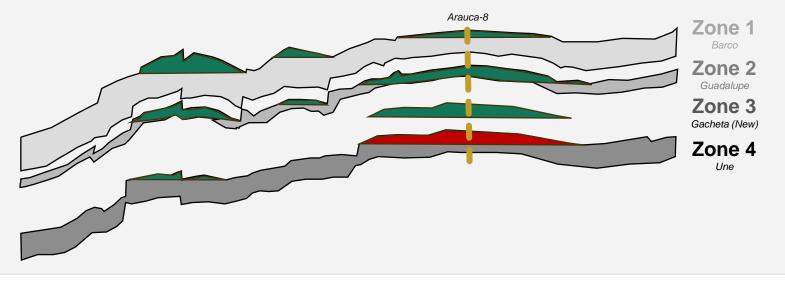

Arauca (Arauca-8): Multi-Zone, High-Impact Exploration Target

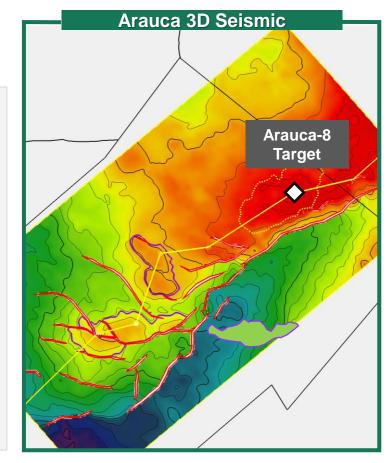

Basin: Northern Llanos Operator: PXT W.I.: 50%⁽¹⁾

Actively testing multiple reservoirs with positive initial results⁽²⁾

- Previous development was on 2D seismic and halted due to social issues
 - What success looks like: development plan with 3-10 wells

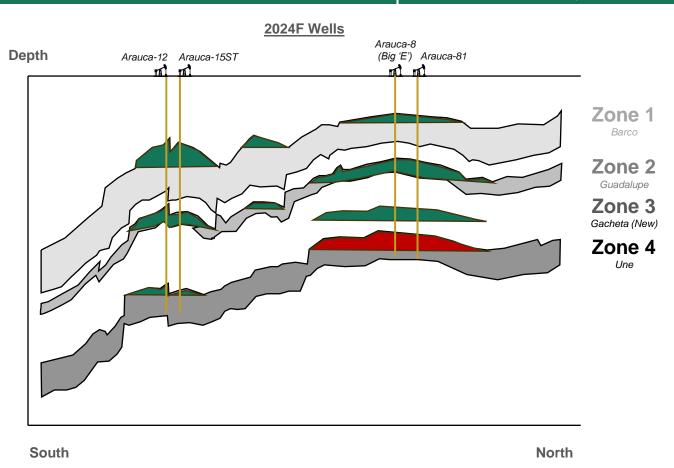

Nearby Producing Field: Capachos Block EUR(3)

3P: 55 mmboe 2P: 41 mmboe 1P: 33 mmboe

Arauca: Building Off of Capachos to Drive Future Growth

Basin: Northern Llanos Operator: PXT W.I.: 50%⁽¹⁾

Key Takeaways

- Targeting proven, multi-zone reservoirs
- New Gacheta zone encountered at Arauca-8;
 prolific Une zone penetrated for the first time⁽²⁾
- 2024 focused on drilling follow-up wells⁽³⁾ and finishing initial facility (capacity: ~40,000 bfpd)

By 2025, expect to grow field from 0 to ~20,000 boe/d gross

Cabrestero & LLA-34: Maximizing Recovery & Free Funds Flow

Basin: Southern Llanos

Operator: PXT (Cabrestero), Non-Operator (LLA-34)

W.I.: 100% (Cabrestero), 55% (LLA-34)

Capital(\$MM)⁽²⁾ → Production (kboe/d)⁽³⁾

Focused on pressure management & minimizing decline

Cabrestero Block

- Planned downspacing and waterflood injection pattern as well as facility expansion completed in 2023
 - Actively ramping up waterflood injection volume
 - Polymer flooding pilot commenced in late Q4 2023 to increase sweep efficiency

LLA-34 Block

- 2024 activities focused on vertical and horizontal producers as well as injectors for the waterflood pattern
 - Upgrading fluid handling capacity by 120,000-160,000 bbl per day
 - Continuing horizontal drilling program based off 2023 success

Infrastructure & technology investments have positioned key assets to have the potential for significant free funds flow⁽⁴⁾ generation

Top-Tier ESG Performance

E

- Reduced GHG intensity by 37% (scope 1 & 2) from 2019 baseline
- Cabrestero solar field completed; projected to avoid 3,500 tCO₂e per year
- Plan to eliminate routine flaring by 2025

S

- Invested over US\$15 million in communities in 2023
- Increased clean drinking water access for over 30,000 people since 2017
- 17 houses built for disadvantaged families since 2017

G

- 9 out of 10 independent directors
- 30% of directors are women
- 21% of 2022 variable compensation linked to ESG performance

External Recognition

24.1 Rating(1)

6th Percentile among global E&Ps Scale: 0 to 50 risk high exposure

AA Rating⁽²⁾

Scale: AAA to CCC

Strategically Investing Across Basins

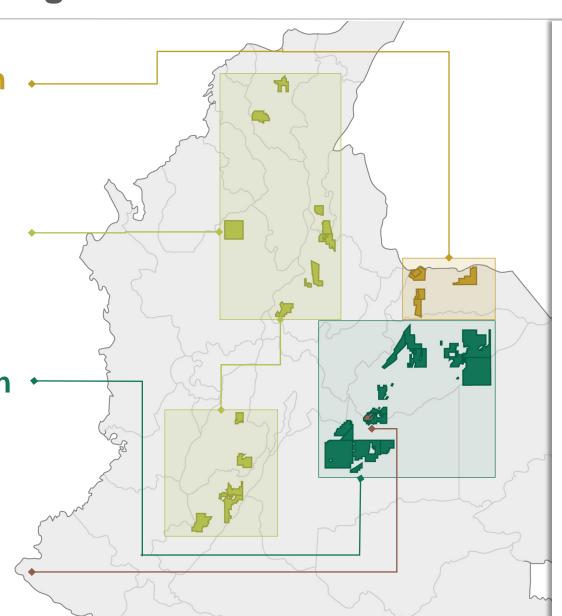

Northern Llanos Basin (Operated)

Magdalena Basins (Operated)

Southern Llanos Basin (Operated)

LLA-34 (Non-Operated)

Diversified Operations

- SOCA⁽¹⁾: Reducing decline rate & future capital requirements
- Northern Llanos
 & Magdalena:
 Foundation for capital efficient growth
- Big 'E' Exploration:
 Deep portfolio of highimpact prospects

(1) Southern Casanare, which includes Cabrestero (100% W.I.) and LLA-34 (55% W.I.).

This presentation is provided for informational purposes only as of January 15, 2024, is not complete and may not contain certain material information about Parex Resources Inc. ("Parex" or the "Company"), including important disclosures and risk factors associated with an investment in Parex. This presentation does not take into account the particular investment objectives or financial circumstances of any specific person who may receive it and does not constitute and does not constitute and information about Parex to make disclosure or any filings with any securities commission or regulatory authority, beyond that imposed by applicable laws.

Forward-Looking Statements and Financial Outlook

Certain information regarding Parex set forth in this presentation contains forward-looking statements that involve substantial known and unknown risks and uncertainties. The use of any of the words "plan", "expect", "prospective", prospective", "prospective", "prospective",

In particular, forward-looking statements contained in this presentation include, but are not limited to, the Company's focus, plans, priorities and strategies and the benefits to be derived from such plans, priorities and strategies; the percentage of funds flow that Parex is targeting to return to its shareholders; that Parex will continue to pay its regular quarterly dividend growth; the focus of Parex's MOU with Ecopetrol S.A. and the anticipated benefits to be derived therefrom; Parex's anticipated average production and funds flow provided by operations per share in 2023 and 2024; Parex's strategic growth levers and the anticipated benefits to be derived therefrom; Parex's anticipated average production and funds flow provided by operations per share in 2023 and 2024; Parex's anticipated denies and the share production, parex's trategic growth levers and percentage production and funds flow provided by operations, capital expenditures, annual investments on high-impact exploration and aggregate free funds flow and its expectations that it will increase production while providing exposure to high-impact exploration and aggregate free funds flow provided by operations into the business and return one-third of funds flow provided by operations to Parex's shareholders through regular dividends and share buybacks; Parex's anticipated funds flow provided by operations netback and income tax rates, surtax and effective tax rates in 2024; the anticipated benefits to be derived from the Cabrestero solar field; Parex's expectations that it will eliminate routine flaring by 2025; Parex's expectations for certain of its place for its gas cycling project will become a template for future expansions at certain of its blocks; and Parex's expectations to monetize dry gas. Statements relating to "reserves" or "resources" are forward-looking statements, as they involve the implied assessment, based on estimates and assumptions that the reserves and resources described exist in the quantities predicted or estimated and can

Although the forward-looking statements contained in this presentation are based upon assumptions which management believes to be reasonable, the Company cannot assure investors that actual results will be consistent with these forward-looking statements contained in this presentation, Parex has made assumptions regarding, among other things: current commodity prices and royalty regimes; availability of skilled labour; timing and amount of capital expenditures; tuture exchange rates; the price of oil, including the anticipated Brent oil price; the impact of increasing competition; conditions in general economic and financial markets, availability of skilled labour; timing and related equipment; effects of regulation by governmental agencies; receipt of partner, regulatory and community approvals; royalty rates; tuture operating costs; effects of regulation by governmental agencies; uninterrupted access to areas of Parex's operations and infrastructure; recoverability of reserves and future production rates; the status of lidition production rates; the price of original performance of non-operated producing fields; pipeline capacity; that Parex will have sufficient cash flow, debt or equity sources or other financial resources required to fund its capital and operating expenditures and requirements as needed; that Parex's conduct and results of operations will be consistent with its expectations; that Parex will have the ability to develop its oil and gas properties in the manner currently contemplated; current or, where applicable, proposed industry conditions, laws and regulations will continue in effect or as anticipated as described herein; that the estimates of Parex's reserves volumes and the assumptions related thereto (including commodity prices and development costs) are accurate in all material resources in the future to pay a dividend; that the Board will declare dividends in the future; that Parex will have sufficient financial resources to repurchase its shares; that Parex's MOU with Ecopetrol S.A.

Included in this presentation are additional forward-looking statements which are estimates of Parex's 2024-2026 annual average net production (including at Cabrestero and LLA-34), annual investment on high-impact exploration and aggregate free funds flow. The foregoing 2025-2026 forecasts are based on various assumptions and are provided for illustration only and are based on budgets and forecasts are based on various assumptions and are provided for illustration only and are based on budgets underlying such forecasts are management prepared only and have not been approved by the Board of Directors of Parex. These forecasts are made as of the date of this presentation and except as required by applicable securities laws, Parex undertakes no obligation to update such forecasts.

These forward-looking statements are subject to numerous risks and uncertainties, including but not limited to, the impact of general economic conditions in Canada and Colombia; industry conditions including dapption of new environmental laws and regulations, and changes in how they are interpreted and enforced, in Canada and Colombia; competition; lack of availability of qualified personnel; the results of exploration and development drilling and related activities; risks related to obtaining required approvals of regulatory authorities, in Canada and Colombia; industry; changes in income tax laws, tax rates and/or incentive programs relating to the oil industry; changes to pipeline capacity; ability to access sufficient capital from internal and external external and external ex

Management has included the above summary of assumptions and risks related to forward-looking information provided in this presentation in order to provide shareholders with a more complete perspective on Parex's current and future operations and such information may not be appropriate for other purposes. Parex's actual results, performance or achievement could differ materially from those expressed in, or implied by, these forward-looking statements and, accordingly, no assurance can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do, what benefits Parex will derive. These forward-looking statements are made as of the date of this presentation and Parex disclaims any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise, other than as required by applicable securities laws. The forward-looking statements.

This presentation also contains a financial outlook, in particular: the percentage of funds flow from operations that Parex is targeting to return to its shareholders; that Parex will continue to pay its regular quarterly dividend growth; Parex's anticipated funds flow provided by operations, capital expenditures and geographical capital distribution; Parex's tree-year plan, including its anticipated annual capital expenditures and geographical capital expenditures and geographical capital expenditures in 2024 – 2026 at Cabrestero and LLA-34; Parex's 2024 netback sensitivity estimates; Parex's long-term capital allocation framework, including its expectations that it will reinvest two-thirds of funds flow provided by operations expenditures, free funds flow provided by operations and return expenditures, free funds flow provided by operations and return expenditures, free funds flow provided by operations and return expenditures. The financial outlook of the Company's activities and results and expenditures to be incurred by the Company, capital expenditures to be incurred by the Company, sentition rates for the Company's production.

Management does not have firm commitments for all of the costs, expenditures, prices or other financial assumptions used to prepare the financial outlook or assurance that such operating results will be achieved and, accordingly, the complete financial effects of all of those costs, expenditures, prices and operating results are not objectively determinable. The actual results of operations of the Company and the resulting financial results will likely vary from the amounts set forth in the analysis presented in this presentation, and such variation may be material. The Company and its management believe that the financial outlook has been prepared on a reasonable basis, reflecting the best estimates and judgments, and represent, to the best of management's knowledge and opinion, Parex's expected expenditures and results of operations. However, because this information is highly subjective and subject to numerous risks discussed above, it should not be relied on as necessarily indicative of future results. Except as required by applicable securities laws, Parex undertakes no obligation to update such financial outlook.

Non-GAAP and Other Financial Measures Advisory

This presentation uses various "non-GAAP financial measures", "non-GAAP ratios", "supplementary financial measures" and "capital management measures" (as such terms are defined in National Instrument 52-112 – Non-GAAP and Other Financial Measures Disclosure). Such measures are not standardized financial measures under IFRS, and might not be comparable to similar financial measures disclosed by other issuers. Such financial measures should not be considered as alternatives to, or more meaningful than measures determined in accordance with GAAP. These measures facilitate management's comparisons to the Company's historical operating results in assessing its results and strategic and operational decision-making and may be used by financial analysts and others in the oil and natural gas industry to evaluate the Company's performance. Further, management believes that such financial measures are useful supplemental information of the gradient of the Company's principal business activities. Please refer to the Company's Management's Discussion and Analysis of the financial condition and results of operations for the period ended September 30, 2023 dated November 7, 2023, which is available at the Company's profile on SEDAR+ at www.sedarplus.ca for additional information about such financial measures, including reconciliations to the nearest GAAP measures, as applicable.

Set forth below is a description of the non-GAAP financial measures, non-GAAP ratios, supplementary financial measures and capital management measures used in this presentation.

Non-GAAP Financial Measures

Free funds flow, is a non-GAPP financial measure that is determined by funds flow provided by operations less capital expenditures. In the third quarter of 2022, the Company changed how it presents exploration and evaluation expenditures. Amounts have been restated for prior periods to conform to the current year's presentation, refer to note 2 of the Company's consolidated interim financial statements for the period ended September 30, 2022. The Company considers free funds flow or free cash flow to be a key measure as it demonstrates Parex's ability to fund return of capital, such as the normal course issuer bid or dividends, without accessing outside funds.

Capital Expenditures, is a non-GAAP financial measure which the Company uses to describe its capital costs associated with oil and gas expenditures. The measure considers both property, plant and equipment expenditures and exploration and evaluation asset expenditures which are items in the Company's statement of cash flows for the period. In the third quarter of 2022, the Company changed how it presents exploration and evaluation expenditures, refer to note 2 of the Company's consolidated interim financial statements for the period ended September 30, 2022.

Non-GAAP Ratios

Funds flow provided by operations netback ("FFO netback"), is a non-GAAP ratio that includes all cash generated from operating activities and is calculated before changes in non-cash working capital, divided by produced oil and natural gas sales volumes. The Company considers FFO netback to be a key measure as it demonstrates Parex's profitability after all cash costs relative to current commodity prices.

Funds flow provided by operations per share, is a non-GAAP ratio that is calculated by dividing funds flow provided by operations by the weighted average number of basic and diluted shares outstanding.

Capital Management Measures

Funds flow provided by operations, is a capital management measure that includes all cash generated from operating activities and is calculated before changes in non-cash working capital. The Company considers funds flow provided by operations to be a key measure as it demonstrates Parex's profitability after all cash costs relative to current commodity prices.

Supplementary Financial Measures

"Dividends per share" is comprised of dividends declared as determined in accordance with IFRS, divided by the number of shares outstanding at the applicable dividend record date.

"Dividend yield" is defined as annualized dividends per share divided by Parex's share price.

Distribution Advisory

The proposed aggregate quarterly dividend payments of US\$115 million in 2024 remain subject to the approval of the Board of Directors of Parex and the declaration of such dividends is subject to a number of other assumptions and contingencies, including commodity prices. The Company's future shares point in the future shares point in the payment of the payment of the payment of the payment of the payment date in connection therewith and any special dividends) or acquire shares of the Company will be subject to the discretion of the Board of Directors of Parex and may depend on a variety of factors, including, without limitation the Company's business performance, financial requirements, and other conditions, expected continuous financial requirements, growth plans, expected continuous financial requirements, and other conditions, financial requirements, growth plans, expected continuous financial requirements and other conditions, financial requirements, growth plans, expected financial growth plans, expected fin

Market, Independent Third Party and Industry Data

Certain market, independent third party and industry data contained in this presentation is based upon information from government or other independent industry publications and reports. Government and industry publications and reports generally indicate that they have obtained their information from government or other independent industry publications and reports. Government or its affiliates have conducted their own independent verification of such information. This presentation also includes certain data derived from independent third parties. While Parex believes this data to be reliable, market and inarket and industry publications and reliability of raw data, the voluntary nature of the data gathering process and other limitations and uncertainties inherent in any statistical survey. None of Parex or its affiliates have independently when the data from independent third-party sources referred to in this presentation or sessumptions reliable upon by such sources.

Oil and Gas Information

The estimates of Parex's December 31, 2022 reserves set forth in this presentation have been prepared by GLJ Petroleum Consultants Ltd. ("GLJ") as of December 31, 2022 with a preparation date of February 3, 2023 in accordance with National Instrument 51-101 and the Gas Evaluations Handbook (the "COGEH") and using GLJ's forecast prices and costs as at December 31, 2021. The estimates of Parex's December 31, 2021 with a preparation date of February 4, 2021 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at January 1, 2021. The estimates of Parex's December 31, 2020 with a preparation date of February 4, 2021 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at January 1, 2021. The estimates of Parex's December 31, 2019 with a preparation date of February 4, 2021 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at January 1, 2021. The estimates of Parex's December 31, 2019 with a preparation date of February 4, 2021 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at January 1, 2020. The estimates of Parex's December 31, 2018 with a preparation date of February 2, 2018 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at January 1, 2017 with a preparation date of February 2, 2018 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at January 1, 2017 with a preparation date of February 2, 2018 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at January 1, 2017 with a preparation date of February 2, 2018 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at January 1, 2017 with a preparation date of February 2, 2018 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at January 1, 2017 with a preparation date of February 2, 2018 in accordance with NI 51-101 and the COGEH and using

Oil and Gas Information (Continued)

This presentation contains certain oil and gas metrics, including netbacks, cash netbacks, funds flow from operations netback and CAGR, which do not have standardized meanings or standard methods of calculation and therefore such measures used by other companies and should not be used to not have standardized meanings or standard methods of calculation and therefore such metrics should not be companied by other companies are not reliable indicators of the future performance may not compare to the Companie yas performance, however, such measures are not reliable indicators of the future performance may not compare to the performance may not compare to the performance may not compare to the companied by the compa

Funds Flow from Operations per boe is a non-GAAP measure that includes all cash generated from operating activities and is calculated before changes in non-cash working capital, divided by sales volumes for the period. In Q2 2019, the Company changed how it presents funds flow provided by (used in) operations to present a more comparable basis to industry presentation.

Operating netback is calculated as oil & gas revenue less expenses (royalties, production and transportation) divided by production for the period.

"BOEs" may be misleading, particularly if used in isolation. A BOE conversion ratio of six thousand cubic feet of natural gas to one barrel price of crude oil as compared to natural gas is significantly different from the energy equivalency of 6:1, utilizing a conversion on a 6:1 basis may be misleading as an indication of value.

This presentation contains certain oil and gas metrics, including FFO netbacks, EUR, cumulative recovery and decline rate which do not have standardized meanings or standard methods of calculation and therefore such measures may not be comparable to similar measures used by other companies and should not be used to make comparisons. Such metrics have been included herein to provide readers with additional measures to evaluate the Company's performance; however, such measures are not reliable indicators of the future performance may not compare to the performance measurements and to provide investors with measures to compare the Company's operations over time. Readers are cautioned that the information provided by these metrics, or that can be derived from the metrics presented herein, should not be relied upon for investment or other purposes.

References in this presentation to initial production test rates, initial "flow" rates, initial "flow" rates, initial flow testing, and "peak" rates, are useful in confirming the presence of hydrocarbons, however such rates are which such wells will commence production and decline thereafter and are not indicative of long-term performance or of ultimate recovery. While encouraging, investors are cautioned not to place reliance on such rates in calculating the aggregate production for Parex. Parex has not conducted a pressure transient analysis or well-test interpretation on the wells referenced in this presentation. As such, all data should be considered to be preliminary until such analysis or interpretation has been done.

Analogous Information

Certain information in this presentation may constitute "analogous information" as defined in NI 51-101. Such information includes production estimates, reserves estimates and other information retrieved from the continuous disclosure record of certain industry participants from www.sedarplus.ca or other publicly available sources. Management of Parex believes the information is relevant as it may help to define the reservoir characteristics and production profile of the noted lands held by Parex, except as otherwise noted. Parex is unable to confirm that the analogous information was prepared by a qualified reserves evaluator or auditor and is unable to confirm that the analogous information was prepared in accordance with NI 51-101. Such information is not an estimate of the production, reserves or resources attributable to noted lands held or to be held by Parex. The reader is cautioned that the data relied upon by Parex may be in error and/or may not be analogous to such lands held or to be held by Parex.
