8 (1) Capital management measure; see advisory. (2) Non-GAAP financial measure; see advisory. (3) Based on C\$0.375 per share quarterly dividend as first approved on February 2, 2023.(4) Non-GAAP financial measure; free funds flow defined as funds flow less capital expenditures; see advisory; remaining FFF defined as FFO less forecast capital expenditures, less the estimated current dividend. (5) Non-GAAP ratio; see advisory

Long-Term Capital Allocation Framework

1. Reinvest ~2/3 of FFO⁽¹⁾ into Business

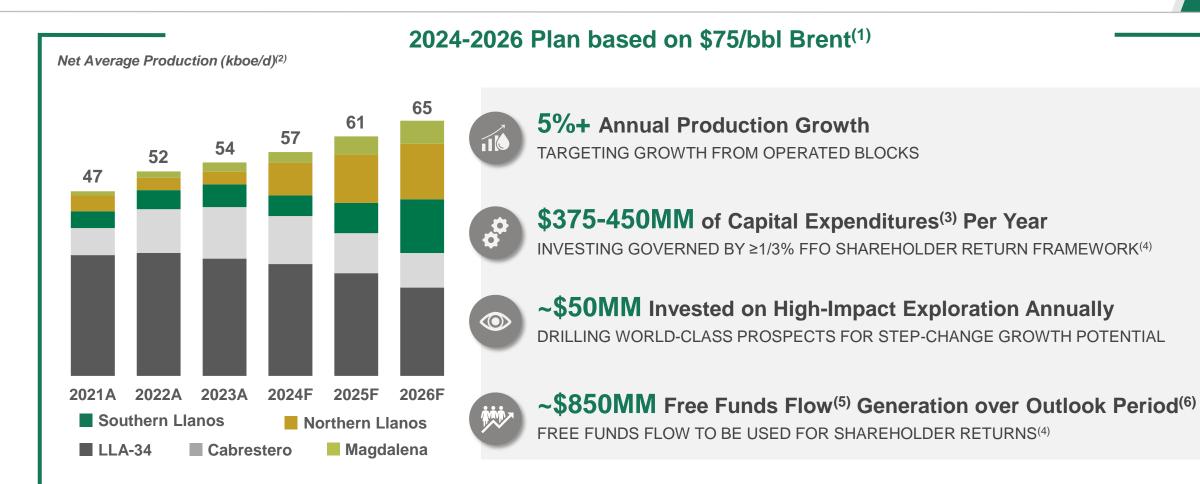

2. Return ≥1/3 to Shareholders⁽²⁾

Near-Field Investments	Big 'E'	Regular Dividends + Share Buybacks
 Drive sustainable business model Invest in long-term growth Replenish development inventory Portion of investment geared towards high-impact, big 'E' exploration Actively manage risk & reward Capitalize on Colombia advantage to generate potential for outsized response. 		 Quarterly regular dividend Target dividend growth Ensure sustainability through commodity cycles Share repurchases Mechanism to supplement returns

Target the return of at least 1/3 of total FFO⁽¹⁾ to shareholders through regular dividends and share buybacks

Three-Year Plan: Growing Production & Free Funds Flow

Plan increases production at reduced capital expenditures⁽³⁾ while providing exposure to high-impact exploration and increasing shareholder returns

See "Forward-Looking Statements and Financial Outlook." (1) Three-year plan derived by utilizing, among other assumptions, historical Parex production performance, current cost assumptions, and Brent crude oil prices assumptions, adjusted annually after 2024; budgets and forecast have not been finalized and are subject to a variety of factors, including prior year's results. (2) See "Historical Production" table within Advisory for production by product type. (3) Non-GAAP financial measure; see advisory. (4) See slide #9. (5) Non-GAAP financial measure; free funds flow defined as FFO less capital expenditures; see advisory. (6) Plan based on 5%+ average annual production growth, capital expenditures of \$375-\$450MM, and FFO netbacks of \$29-32/bbl Bent crude oil pricing (no hedging assumed).

2024 High-Impact Exploration Plan

LLA-122⁽¹⁾

VIM-1⁽¹⁾

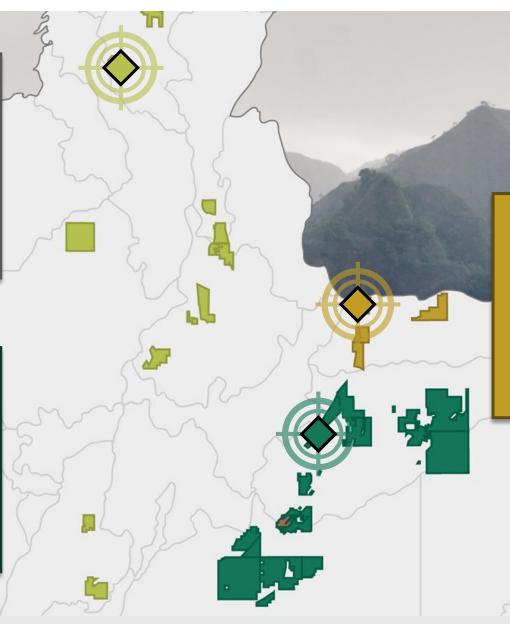

Hydra

Potential surrounds La Belleza

Planned spud Q2-Q3 2024 Targeting gas & condensate

High-potential Foothills trend Began drilling in Q1 2024 Targeting gas & condensate

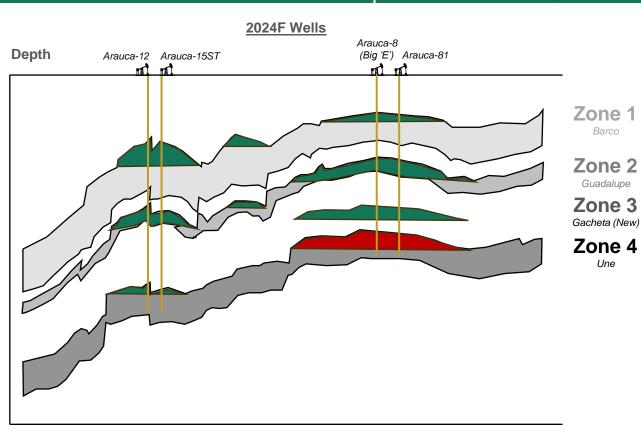

LLA-38⁽¹⁾ Berillo Oeste

Adjacent trend to Arauca Planned spud Q4 2024 Targeting light oil & gas

Arauca: Building Off of Capachos to Drive Future Growth

North

W.I.: 50%⁽¹⁾

Key Takeaways

- Targeting proven, multi-zone reservoirs
- New Gacheta zone encountered at Arauca-8; prolific Une zone penetrated for the first time⁽²⁾
- 2024 focused on drilling follow-up wells⁽³⁾ and finishing initial facility (capacity: ~40,000 bfpd)

By 2025, expect to grow field from 0 to ~20,000 boe/d gross

Operator: PXT

See "Forward-Looking Statements and Financial Outlook" advisory

South

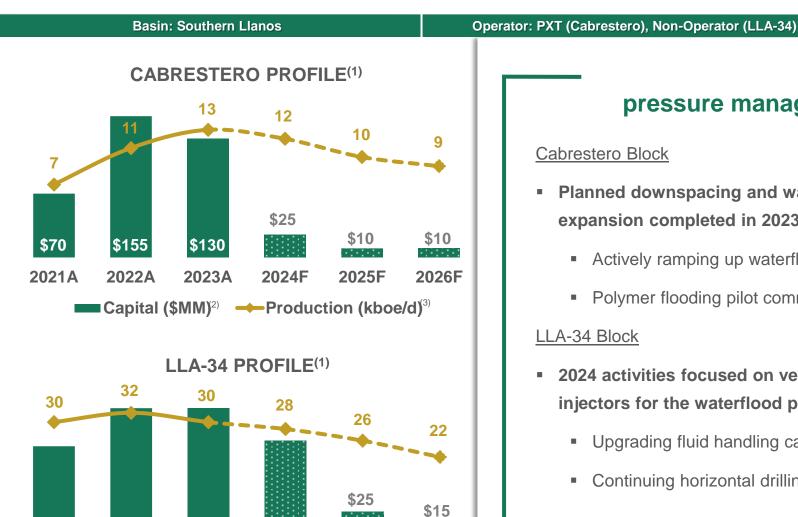

Basin: Northern Llanos

(1) Arauca Block working interest is under a 50% participating share under a business collaboration agreement ("BCA") with Ecopetrol S.A. (2) See "Oil and Gas Information" advisory; well test details (see January 15, 2024 news release). (3) Subject to partner approval.

Cabrestero & LLA-34: Maximizing Recovery & Free Funds Flow

W.I.: 100% (Cabrestero), 55% (LLA-34)

Focused on pressure management & minimizing decline

Cabrestero Block

- Planned downspacing and waterflood injection pattern as well as facility expansion completed in 2023
 - Actively ramping up waterflood injection volume
 - Polymer flooding pilot commenced in late Q4 2023 to increase sweep efficiency

LLA-34 Block

- 2024 activities focused on vertical and horizontal producers as well as injectors for the waterflood pattern
 - Upgrading fluid handling capacity by 120,000-160,000 bbl per day
 - Continuing horizontal drilling program based off 2023 success

Infrastructure & technology investments have positioned key assets to have the potential for significant free funds flow⁽⁴⁾ generation

Creating Shareholder Value

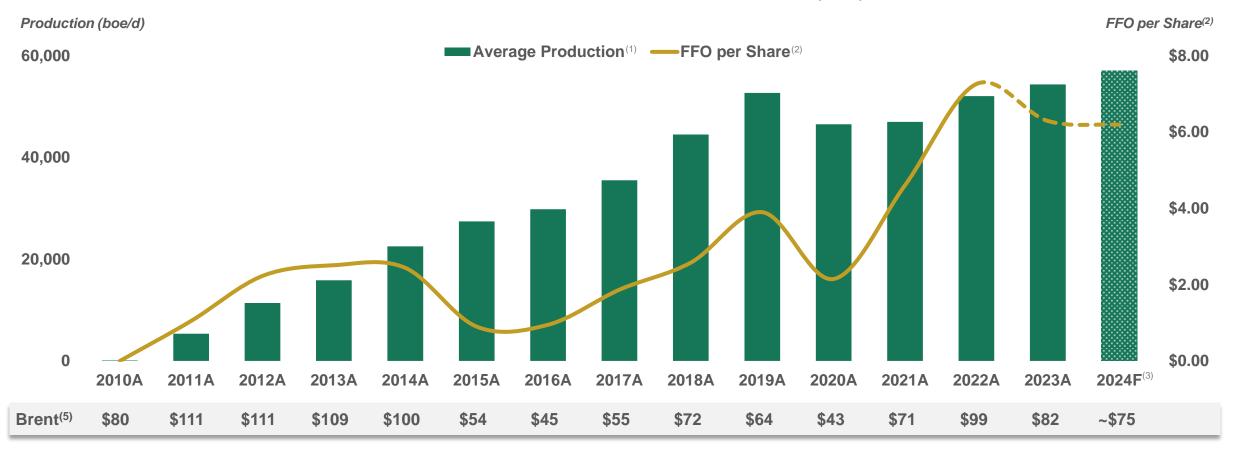

To drive free funds flow and reserve increases, focused on enhancing capital efficiency, delivering exploration success and growing production per share

(1) Calculated as net income before net finance expense and current tax expense dividend by total assets less current liabilities; non-GAAP ratio; see advisory. (2) Calculated as total annual production divided by weighted-average basic shares; see "Historical Production" table within advisory for production by product type; supplemental financial measure; see advisory. (3) Calculated as PDP gross volume divided by year-end basic shares; see advisory. (4) Calculated as total annual free funds flow divided by weighted-average basic shares; non-GAAP ratio; see advisory. (5) Three-year average (2021A-2023A). (6) Three-year CAGR (2020A-2023A).

PRODUCTION AND FUNDS FLOW PROVIDED BY OPERATIONS (FFO) PER SHARE

Parex has a 10+ year track record in Colombia of creating value in multiple different commodity price scenarios

See "Forward-Looking Statements and Financial Outlook" advisory

(1) See "Historical Production" table within advisory for production by product type. (2) Non-GAAP ratio; per share based on weighted-average basic shares; see advisory. (3) Production and FFO per share based on Parex 2024 guidance midpoint (see slide #7 and January 15, 2024 news release); per share based on 101.0 million ustanding shares. (5) Average Brent crude oil price per bbl for noted periods; 2024 price is based on Parex's 2024 guidance (see slide #7 and January 15, 2024 news release).

Top-Tier ESG Performance

Ε

- Reduced GHG intensity by 39% (scope 1 & 2) from 2019 baseline
- Avoided ~5,300 tCO₂e by connecting the Cabrestero field to the electricity grid
- Plan to eliminate routine flaring by 2025

Invested over US\$20 million in communities in 2023

- Increased clean drinking water access for over 37,000 people since 2017
- 17 houses built for disadvantaged families since 2017

G

- 8 out of 9 independent directors
- 33% of directors are women
- 25% of 2023 variable compensation linked to ESG performance

Key Takeaways

- 2024 focus is on *increasing overall cash* that can be used to *reward shareholders*
- Long-term *track record* of production growth and return of capital
- Invested in technology & infrastructure to *flatten decline rates of key assets*
- Strategic partner with Ecopetrol S.A., with *growing Northern Llanos production* and MOU signed in *high-potential Foothills trend*
- Deep portfolio and three-year outlook shows asset sustainability
- Continuing to deliver top-tier ESG performance

Advisory

This presentation is provided for informational purposes only as of April 23, 2024, is not complete and may not contain certain material information about Parex Resources Inc. ("Parex" or the "Company"), including important disclosures and risk factors associated with an investment in Parex. This presentation does not take into account the particular investment objectives or financial circumstances of any specific person who may receive it and does not constitute an offer to buy any security in Canada, the United States or any other jurisdiction. The contents of this presentation have not been approved or disapproved by any securities commission or regulatory authority in Canada, the United States or any other jurisdiction, and Parex expressly disclaims any duty on Parex to make disclosure or any filings with any securities commission or regulatory authority, beyond that imposed by applicable laws.

Forward-Looking Statements and Financial Outlook

Certain information regarding Parex set forth in this presentation contains forward-looking statements that involve substantial known and unknown risks and uncertainties. The use of any of the words "plan", "expect", "project", "pr

In particular, forward-looking statements contained in this presentation include, but are not limited to, the Company's focus, plans, priorities and strategies; the percentage of funds flow that Parex is targeting to return to its shareholders; that Parex will continue to pay its regular quarterly dividend; Parex's anticipated querterly dividend growth; the focus of Parex's MOU with Ecopetrol S.A. and the anticipated benefits to be derived therefrom; Parex's expectation that it has limited cost, including its anticipated total production, and funds flow provided by operations per share in 2023 and 2024; Parex's strategic growth levers and the anticipated benefits to be derived therefrom; Parex's expectation that it has the technology and people in place to execute on its strategy; Parex's updancin, including its anticipated total production, funds flow provided by operations, annual investments on high-impact exploration and aggregate free funds flow and its expectations that it will increase production while providing exposure to high-impact exploration and aggregate free funds flow provided by operations, current dividend, capital expenditures, annual investments on high-impact exploration and aggregate free funds flow provided by operations per share in 2023 entbacks; Parex's anticipated funds flow provided by operations, current dividend, capital expenditures, and increasing shareholder returns; Parex's 2024 netbacks; Parex's anticipated funds flow provided by operations, current dividend, capital expenditures, free funds flow frow the chartest funds flow provided by operations per share in 2023. Parex's expectations that it will increase production while provided by operations, current dividend, capital expenditures, free funds flow frow the capital allocate framework, including its anticipated funds flow provided by operations, current dividend, capital expenditures, production, payouts and eterption framework and increasing shareholder returns; Parex's expectations that it will increase exploration and i

Although the forward-looking statements contained in this presentation are based upon assumptions which management believes to be reasonable, the Company cannot assure investors that actual results will be consistent with these forward-looking statements. With respect to forward-looking statements contained in this presentation, Parex has made assumptions regarding, among other things: current commodity prices and nyalty regimes; availability of skilled labour; timing and amount of capital expenditures; thure exchange rates; the price of oil, including the anticipated Brent oil price; the impact of increasing competition; conditions in general economic and financial markets; availability of skilled adoupment; effects of regulation by governmental agencies; receipt of partner, regulatory and community approval; rowalty rates; thure operating costs; effects of regulation by governmental agencies; uniterrupted access to areas of Parex's operations and infrastructure; recoverability of reserves and functure; receipt of partners, thus of litigations; import of duells; on-stream the status of litigations, be consistent with its expectations; uniter producing fields; pipeline capacity; that Parex will have sufficient cash flow, debt or equity sources or other financial resources required to fund its capital and operating expenditures and requirements as needed; that Parex's conduct and results of operations will be consistent with its expectations; that Parex will have the ability to develop its oil and gas properties in the manner currently contemplated; current or, where applicable, proposed industry conditions, laws and regulations will continue in effect or as anticipated as described herein; that the estimates of Parex's reserves soluties of the future; that Parex will have sufficient financial resources in the future to pay a dividend; in the future to pay a dividend; in the future; that Parex will have sufficient financial resources to repurchase its shares; that Parex's MOU with Ecoopertol S.A. will lead to a

Included in this presentation are additional forward-looking statements which are estimates of Parex's 2024-2026 annual average net production (including at Cabrestero and LLA-34), annual capital expenditures (including at Cabrestero and LLA-34), annual investment on high-impact exploration and aggregate free funds flow. The foregoing 2025-2026 forecasts are based on various assumptions and are provided for illustration only and are based on budgets and forecasts that have not been finalized and are subject to a variety of contingencies including prior years' results. In addition, the foregoing 2025-2026 forecasts and any capital budgets underlying such forecasts are management prepared only and have not been approved by the Board of Directors of Parex. These made as of the date of the d

These forward-looking statements are subject to numerous risks and uncertainties, including but not limited to, the impact of general economic conditions in Canada and Colombia; industry conditions inlouging adoption of new environmental laws and regulations, and changes in how they are interpreted and enforced, in Canada and Colombia; competition, lack of availability of qualified personnel; the results of exploration and development drilling and related activities; risks related to obtaining required approvals of regulations in foreing porcernances tas well as country risks associated with conducting; value of the oil industry; changes to be pipeline capacity; ability on miternal and extensily of counters rates are/or on internal and extensily approvals of sugulations in the oil industry; changes to be pipeline capacity; ability of additions in foreing porcernances tas early on the oil industry; changes to be pipeline capacity; ability on access sufficient capital from internal and extensily approvals of egulations in the oil industry; changes to be pipeline capacity; ability on access sufficient capital from internal and extensily externes traces and/or incentive programs relating to the oil industry; changes to be pipeline capacity; ability on access sufficient capital from internal and extensily on a development opportunities is not consistent with its expectations; that Parex's evaluation of its existing portfolio of assets and exploration and development opportunities is not consistent with its expectations; that Parex's evaluation of the future; the risk that Parex's MOU with Ecopetrol S.A. may not lead to a completed project; the risk that Parex's futor show provided by operations and capital exponitories and that the pare's analy to exploration and there and exploration and there approace or instrates and/or in the state and/or instrates and/or instersi approacies and exploration and

Management has included the above summary of assumptions and risks related to forward-looking information provided in this presentation in order to provide shareholders with a more complete perspective on Parex's current and future operations and such information provided in this presentation in order to provide shareholders with a terment sund target of the events and such information provided in this presentation and of the events and coording statements, whether as a result of hew information provided in this presentation and Parex disclaims any intent or obligation to update publicly any forward-looking statements, whether as a result of new information, future events or results or otherwise, other than as required by applicable securities laws. The forward-looking statement, whether as a result of new information, future events or results or otherwise, other than as required by applicable securities laws. The forward-looking statement, whether as a result of new information, future events or results or otherwise, other than as required by applicable securities are expressed as a result of new information.

This presentation also contains a financial outlook, in particular: the percentage of funds flow from operations that Parex is targeting to return to its shareholders; that Parex will continue to pay its regular quarterly dividend; Parex's anticipated quarterly dividend growth; Parex's anticipated funds flow provided by operations, capital expenditures and geographical expenditures, annual investments on high-impact exploration, aggregate free funds flow and its expectations that it will increase shareholder returns; forecasted capital expenditures in 2024 – 2026 at Cabrestero and LLA-34; Parex's 2024 netback sensitivity estimates; Parex's long-term capital allocation framework, including its expectations that it will reinvest two-thirds of funds flow provided by operations into the business and return on-tigh-impact exploration, aggregate free funds flow provided by operations into the business and return on-tigh-impact exploration, aggregate free funds flow provided by operations into the business and return on-tigh-impact exploration is that return or the shareholder is that return on tigh-impact exploration into the business and return on-tight of funds flow provided by operations into the business and return on-tight of funds flow provided by operations into the business and effective tax rates, surtax and effective tax rates, surtax and effective tax rates, surtax and effective tax rates in 2024. Such financial outlook has been prepared by Parex's management to provide an outlook of the Company's producid on a number of assumptions including the assumptions with respect to the costs and expenditures to be pincire to be preating costs, foreign exchange rates for the Company's producion.

Management does not have firm commitments for all of the costs, expenditures, prices and operating results are not objectively determinable. The actual results of operating results will be achieved and, accordingly, the complete financial effects of all of those costs, expenditures, prices and operating results will be achieved and, accordingly, the complete financial effects of all of those costs, expenditures, prices and operating results are not objectively determinable. The actual results of operations of the Company and the resulting financial results will likely vary form the amounts set forth in the analysis presented in this presentation, and such variation may be material. The Company and its management believe that the financial outlook has been prepared to a reasonable basis, reflecting the best stimates and judgments, and represented on management's knowledge and opinion, Parex's expected expenditures and results of perations. However, because this and judgment believe that the financial outlook has been prepared to the under such financial securities laws, existed to not be relied on as necessarily indicative of future results. Except as required by applicable securities and securities laws, results of operations to update such financial outlook.

Non-GAAP and Other Financial Measures Advisory

This presentation uses various "non-GAAP financial measures", "supplementary financial measures" and "capital management measures" (as such terms are defined in National Instrument 52-112 – Non-GAAP and Other Financial Measures Disclosure). Such measures are not standardized financial measures" (as such terms are defined in National Instrument 52-112 – Non-GAAP and Other Financial Measures Disclosure). Such measures are not standardized financial measures should not be comparable to similar financial measures disclosed by other issuers. Such financial measures should not be considered as alternatives to, or more meaningful than measures determined in accordance with GAAP. These measures facilitate management's company's historical operating results and strategic and operational decision-making and may be used by financial analysts and others in the oil and natural gas industry to evaluate the Company's performance. Further, management believes that such financial measures are useful supplemental information to analyze operating performance and provide an indication of the results generated by the Company's principal business activities. Please refer to the Company's Management's Discussion and Analysis of the financial condition and results of operations for the period ended September 30, 2023 dated November 7, 2023, which is available at the Company's profile on SEDAR+ at www.sedarplus.ca for additional information about such financial measures, including reconciliations to the nearest GAAP measures.

Set forth below is a description of the non-GAAP financial measures, non-GAAP ratios, supplementary financial measures and capital management measures used in this presentation.

Non-GAAP Financial Measures

Free funds flow, is a non-GAAP financial measure that is determined by funds flow provided by operations less capital expenditures. In the third quarter of 2022, the Company changed how it presents exploration and evaluation expenditures. Amounts have been restated for prior periods to conform to the current year's presentation, refer to note 2 of the Company's consolidated interim financial statements for the period ended September 30, 2022. The Company considers free funds flow or free cash flow to be a key measure as it demonstrates Parex's ability to fund return of capital, such as the normal course issuer bid or dividends, without accessing outside funds.

Capital Expenditures, is a non-GAAP financial measure which the Company uses to describe its capital costs associated with oil and gas expenditures. The measure considers both property, plant and evaluation asset expenditures which are items in the Company's statement of cash flows for the period. In the third quarter of 2022, the Company changed how it presents exploration and evaluation expenditures, refer to note 2 of the Company's consolidated interim financial statements for the period ended September 30, 2022.

Non-GAAP Ratios

Funds flow provided by operations netback ("FFO netback"), is a non-GAAP ratio that includes all cash generated from operating activities and is calculated before changes in non-cash working capital, divided by produced oil and natural gas sales volumes. The Company considers FFO netback to be a key measure as it demonstrates Parex's profitability after all cash costs relative to current commodity prices.

Funds flow provided by operations per share, is a non-GAAP ratio that is calculated by dividing funds flow provided by operations by the weighted average number of basic and diluted shares outstanding.

Free Funds flow per share, is a non-GAAP ratio that is calculated by dividing free funds flow by the weighted average number of basic and diluted shares outstanding.

Return on average capital employed ("ROACE"), is a non-GAAP ratio that is calculated as net income before net finance expense and current tax expense dividend by total assets less current liabilities. The Company considers ROACE to be a key measure as it demonstrates Parex's long-term performance as it relates to capital efficiency.

Capital Management Measures

Funds flow provided by operations, is a capital management measure that includes all cash generated from operating activities and is calculated before changes in non-cash working capital. The Company considers funds flow provided by operations to be a key measure as it demonstrates Parex's profitability after all cash costs relative to current commodity prices.

Supplementary Financial Measures

"Dividends per share" is comprised of dividends declared as determined in accordance with IFRS, divided by the number of shares outstanding at the applicable dividend record date.

"Dividend yield" is defined as annualized dividends per share divided by Parex's share price.

"Production per share growth" is comprised of the Company's total oil and natural gas production volumes divided by the weighted average number of basic shares outstanding, whereby per share amounts are calculated using weighted-average shares outstanding, consistent with the calculation of earnings per share. Growth is determined in comparison to the comparative year.

Distribution Advisory

The proposed aggregate quarterly dividend payments of US\$115 million in 2024 remain subject to the approval of the Board of Directors of Parex and the declaration of such dividends is subject to a number of other assumptions and contingencies, including commodity prices. The Company's future shareholder distributions, including but not limited to the payment of dividends and the acquisition by the Company of its shares pursuant to its normal course issuer bid, if any, and the level thereof is uncertain. Any decision to pay further dividends on the common shares (including the actual amount, the declaration date, the record date and the payment date in connection therewith and any special dividends) or acquire shares of the Company will be subject to the discretion of the Board of Directors of Parex and may depend on a variety of factors, including, without limitation the Company subjects and statisfaction of the solvency tests imposed on the company under applicable corporate law. Any purchases of common shares pursuant to a normal course issuer bid is subject to all requirements and other conditions exist of company will pay dividends to shareholders is not assured or guaranteed and dividends or repurchase any share of the Company will pay dividends to shareholders is not assured or guaranteed and dividends may be limited by covenants contained in the agreements governing any indebtedness that the Company has incurred or may incur in the future. Including the terms of the creding, the creding in the future.

Market, Independent Third Party and Industry Data

Certain market, independent third party and industry data contained in this presentation is based upon information from government or other independent industry publications and reports. Government or other independent industry publications and reports generally indicate that they have obtained their information from government or other independent industry publications and reports. Government or other independent industry publications and reports and reports or based upon information. This presentation also includes certain data derived from independent industry publications and reports and reports

Oil and Gas Information

The estimates of Parex's December 31, 2023 reserves set forth in this presentation have been prepared by GLJ Petroleum Consultants Ltd. ("GLJ") as of December 31, 2023 with a preparation date of February 29, 2024 in accordance with National Instrument 51-101 – Standards of Disclosure for Oil and Gas Activities ("NI 51-101") and the Canadian Oil and Gas Evaluations Handbook (the "COGEH") and using GLJ's forecast prices and costs as at January 1, 2024. The estimates of Parex's December 31, 2022 reserves set forth in this presentation have been prepared by GLJ as of December 31, 2022 with a preparation date of February 3, 2023 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at December 31, 2021 reserves set forth in this presentation have been prepared by GLJ as of December 31, 2021 with a preparation date of February 4, 2021 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at December 31, 2021 with a preparation date of February 4, 2021 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at December 31, 2020 reserves set forth in this presentation have been prepared by GLJ as of December 31, 2021 reserves set forth in this presentation have been prepared by GLJ as of December 31, 2021 reserves set forth in this presentation have been prepared by GLJ as of December 31, 2021 reserves set forth in this presentation have been prepared by GLJ as of December 31, 2021 reserves set forth in this presentation have been prepared by GLJ as of December 31, 2020 reserves set forth in this presentation have been prepared by GLJ as of December 31, 2021 reserves set forth in this presentation have been prepared by GLJ as of December 31, 2019 with a preparation date of February 6, 2020 in accordance with NI 51-101 and the COGEH and using GLJ's forecast prices and costs as at January 1, 2019. The estimates of Parex's December 31, 2017 reserves set forth in this presentation have been prepared by GLJ as of December 31,

This presentation contains certain oil and gas metrics, including netbacks, cash netbacks, funds flow from operations netback and CAGR, which do not have standardized meanings or standard methods of calculation and therefore such measures may not be comparable to similar measures used by other companies and should not be used to make comparisons. Such metrics have been included herein to provide readers with additional measures to evaluate the Company's performance of the Company's performance of the Company's performance of the Company's of the Company's of the company and future performance of the company and to provide additional measures should not be unduly relied upon. Management uses these oil and gas metrics or the performance of the Company's operations over time. Readers are cautioned that the information provided by these metrics, or that can be derived from the metrics presented herein, bud rot be relied upon formate to the purposes. A submatrix of the calculations of such metrics are cautioned that the information provided by these metrics, persented herein, bud rot be relied upon formations or the purposes. A submatrix of the calculations of such metrics are cautioned that the information provided by these metrics, persented herein, bud rot be relied upon formations or the purposes. A submatrix of the calculations of such metrics are cautioned that the information provided by the information provided by these metrics presented herein, bud rot be relied upon formations or the purposes. A submatrix of the calculations of such areas the submatrix of the calculations of such areas the submatrix or the formation performance in perform

Funds Flow from Operations per boe is a non-GAAP measure that includes all cash generated from operating activities and is calculated before changes in non-cash working capital, divided by sales volumes for the period. In Q2 2019, the Company changed how it presents funds flow provided by (used in) operations to present a more comparable basis to industry presentation.

Operating netback is calculated as oil & gas revenue less expenses (royalties, production and transportation) divided by production for the period.

"BOEs" may be misleading, particularly if used in isolation. A BOE conversion ratio of six thousand cubic feet of natural gas to one barrel of oil equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Given that the value ratio based on the current price of crude oil as compared to natural gas is significantly different from the energy equivalency of 6:1, utilizing a conversion on a 6:1 basis may be misleading as an indication of value.

This presentation contains certain oil and gas metrics, including FFO netbacks, EUR, cumulative recovery and decline rate which do not have standardized meanings or standard methods of calculation and therefore such measures may not be comparable to similar measures used by other companies and should not be used to make comparisons. Such metrics have been included herein to provide readers with additional measures to evaluate the Company's performance; however, such measures are not reliable indicators of the future performance on the company and future performance on the company and future performance on the company and future performance in previous periods and therefore such metrics should not be unduly relied upon. Management uses these oil and gas metrics for its own performance measurements and to provide investors with measures to compare the Company's operations over time. Readers are cautioned that the information provided by these metrics, or that can be derived from the metrics presented herein, should not be relied upon for investment or other purposes.

References in this presentation to initial production test rates, initial flow resting, and "peak" rates, are useful in confirming the presence of hydrocarbons, however such rates are not determinative of the rates at which such wells will commence production and decline thereafter and are not initial flow resting, and "peak" rates, are useful in confirming the presence of hydrocarbons, however such rates are twich such wells will commence production and decline thereafter and are not initial flow resting, and "peak" rates, are useful in confirming the presence of hydrocarbons, however such rates are twich such wells will commence production and decline thereafter and are not initial flow resting, and "peak" rates, are useful in confirming the presence of hydrocarbons, however such rates are cautioned not to place reliance on such rates in calculating the aggregate production for Parex. Parex has not conducted a pressure transient analysis or well-test interpretation. As such, all data should be considered to be preliminary until such analysis or interpretation has been done.

Analogous Information

Certain information in this presentation may constitute "analogous information" as defined in NI 51-101. Such information includes production estimates, reserves estimates and other information is relevant as it may help to define the reservoir characteristics and production profile of the noted lands held by Parex, except as otherwise noted. Parex is unable to confirm that the analogous information was prepared by a qualified reserves evaluator or auditor and is unable to confirm that the analogous information may constitute the production, reserves evaluator or auditor and is unable to confirm that the analogous information was prepared by a qualified reserves evaluator or auditor and is unable to confirm that the analogous information is not an estimate of the production, reserves or resources attributable to noted lands held or to be held by Parex and there is no certainty that the production, reserves or resources data and economic information for the noted lands held or to be held by Parex may be in error and/or may not be analogous to such lands held or to be held by Parex.

Abbreviations

bbl(s)	barrel(s)	mboe/d	million barrels of oil equivalent per day
bbl(s)/d or bopd	barrel(s) of oil per day	mcf/d	thousand cubic feet per day
Mmbbl	million barrels	Mmcf/d	million cubic feet per day
kbbl/d	thousand barrels of oil per day	ММ	millions
BOE or boe	barrel of oil equivalent	W.I.	working interest
Mmboe	million barrels of oil equivalent	Brent	Brent Ice
boe/d	barrels of oil equivalent per day	FFO	funds flow provided by operations
kboe/d	thousand barrels of oil equivalent per day	FFF	free funds flow
Bfpd	barrels of fluid per day	tCO2e	tonnes of carbon dioxide equivalent
